

What Do Customers Say?

"I tried Sundew on my cat's bedding and they didn't flinch. Normally, my cats are super sensitive to any change in their environment." Cristina, Richmond, Victoria.

"Love the vanilla fragrance and it's killing fleas at the same time". Anna, Monbulk, Victoria.

"I don't have to chase my cat around the house to treat it anymore. I just spray his bed, it's so easy." David, Hampton, Victoria.

Available in Lavender or Vanilla Fragrance

FAQs

How does it work?

SUNDEW Flea Control Deodorising Household Flea Spray is administered to carpets and pet bedding. This user friendly aerosol works via simple contact with fleas and they die shortly after.

Is it easy to use?

Yes. Simply shake the aerosol can and **spray lightly** onto pet bedding, carpets or furnishings. There is no requirement to spray on your pet for protection.

Why spray bedding instead of the Pet?

Fleas spend 90% of their time in other places waiting for an opportunity to attach to pets. So it makes sense to treat where the flea problem is coming from.

How long does it take to kill fleas?

Tests demonstrate that SUNDEW Flea Control Deodorising Household Flea Spray resulted in 90% of fleas killed within 2 hours and **100% of fleas killed by 4 hours**.

How long does it last?

SUNDEW Flea Control Deodorising Household Flea Spray is designed to maintain its high level of control for up to **30 days** following application.

Is this product used by veterinarians?

SUNDEW Flea Control Deodorising Household Flea Spray is an approved flea treatment product. Veterinarians recommend Sundew and stock this product in the veterinary clinic.

● **KILLS FLEAS**

FAQs

Is it safe?

Yes. Tests have determined that the active ingredient of SUNDEW Flea Control Deodorising Household Flea Spray (Imidacloprid) does not cause mutations, cancer, foetal malformations or any other reproductive effects in animals. Studies have found animals don't react to repeated use or that it increases the skin's susceptibility to sun damage.

The active ingredient in SUNDEW Flea Control Deodorising Household Flea spray is a **powerful flea control** and has been proven effective in killing fleas and flea larvae in veterinary products such as Advantage® or Advocate® for more than 15 years.

What is different about Sundew Flea Control Deodorising Household Flea Spray?

SUNDEW Flea Control Deodorising Household Flea Spray is the first in the world to combine a safe and powerful flea control product with a room fragrance in an easy to use aerosol.

Can it be used around pets other than dogs and cats?

Yes. It is okay to use around warm blooded pets such as birds, rabbits, guinea pigs and rodents.

Can I overdose my pet?

Studies have found animals don't have a negative reaction to repeated application when this product is used as directed.

● **DEODORISES**

Enjoy a **FLEA FREE** and **FRAGRANT HOME**

SUNDEW Flea Control Deodorising Household Flea Spray can be sprayed on bedding, furniture, carpets, in a room, car, kennel or caravan. It **kills fleas before they have the chance to leap onto your pet** so you can rest assured that you are no longer sharing fleas or pet odours with family and friends.

Sundew Flea Control Deodorising Household Flea Spray does not contain pyrethrin like other products which have been documented to cause sickness (and death) in felines. The active ingredient used in Flea Control Deodorising Household Flea Spray was chosen specifically because of its excellent safety profile with domestic companion animals.

SUNDEW Flea Control Deodorising Household Flea Spray is available in **two fragrances; vanilla and lavender**. One 200 g aerosol can provides a flea free and pleasantly fragrant environment.

Suitable for cats, dogs, birds, guinea pigs, rabbits and rodents. For more information visit our website www.sundewflea.com.au
