

1. Chemical Product and Company Identification

Product Name	Rinse Surfactant 2000
Other Means of Identification	None
Product Code	3x5lt: 41-497
Product Use	pH neutralising rinse
Supplier	Solo Pak Pty Ltd
ABN	29 076 652 269
Mail Address	PO Box 67, Brisbane Markets QLD, 4106
Email	sales@solopak.com.au
Telephone:	1300 307 755
Facsimile	07 3378 4100
Emergency Telephone:	Poisons Information Centre (National) 131126

2. Hazards Identification

Classification of the substance or mixture

This product is classified as Hazardous according to the criteria of SWA.

HAZARDOUS SUBSTANCE. NON-DANGEROUS GOODS. According to the Criteria of NOHSC, and the ADG Code.

GHS Classification	Eye Damage / Irritation 2A
---------------------------	-----------------------------------

GHS Label Elements	
---------------------------	---

SIGNAL WORD	WARNING
--------------------	----------------

Hazard Statement(s)

H319	Causes serious eye irritation
------	-------------------------------

Prevention(s)

P102	Keep out of reach of children.
P270	Wash contacted areas thoroughly after handling.
P280	Wear protective gloves / protective clothing / eye protection / face protection.

Refer to the SDS before using the product.

Response

Advances SE Rinse Surfactant 2000

P 301+P330+P331	IF SWALLOWED: Rinse mouth. Do NOT induce vomiting.
P 303+P361+P353	IF ON SKIN (or hair): Remove immediately all contaminated clothing. Rinse skin with water.
P 305+P351+P338	IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.

Storage

P404:	Store in a closed container.
-------	------------------------------

Disposal

P 501	Dispose of contents/container in accordance with local/regional/national/international regulations.
-------	---

3. Composition/Information on Ingredients

(Listed when present at 1% or greater, carcinogens at 0.1% or greater)

Chemical Name	CAS Registry Number	% Weight	Hazard Information
Sodium Bicarbonate	144-55-8	<10	H320: Causes eye irritation
Cocamidopropyl betaine	61789-40-0	<5	H315 Causes skin irritation. H319 Causes serious eye irritation
Sodium C14-C16 Olefin Sulfonate	68439-57-6	<5	H302: Harmful if swallowed H315: Causes skin irritation H319: Causes serious eye irritation H401: Toxic to aquatic life H412: Harmful to aquatic life with long lasting effects
Ingredients determined to be non-hazardous	Various	Too 100	None

The SWA TWA exposure value is the average airborne concentration of a particular substance when calculated over a normal 8 hour working day for a 5-day working week. The STEL (Short Term Exposure Limit) is an exposure value that may be equaled (but should not be exceeded) for no longer than 15 minutes and should not be repeated more than 4 times per day. There should be at least 60 minutes between successive exposures at the STEL. The term "peak "is used when the TWA limit, because of the rapid action of the substance, should never be exceeded, even briefly.

4. First Aid Measures

General	For advice, contact a Poisons Information Centre (Australia 13 11 26) or a doctor. If swallowed, do NOT induce vomiting. Immediately give a glass of water.
Inhalation	No first aid measures normally required. However, if inhalation has occurred, and irritation has developed, remove to fresh air and observe until recovered. If irritation becomes painful or persists more than about 30 minutes, seek medical advice.
Skin	Wash gently and thoroughly with water (use non-abrasive soap if necessary) for 5 minutes or until chemical is removed.
Eyes	Immediately flush the contaminated eye(s) with lukewarm, gently

Ingestion

flowing water for 5 minutes or until the product is removed, while holding the eyelid(s) open. Obtain medical advice immediately if irritation occurs. Take special care if exposed person is wearing contact lenses.

If swallowed, do NOT induce vomiting. Wash mouth with water and contact a Poisons Information Centre or call a doctor.

Indication of any immediate medical attention and special treatment needed
Treat symptomatically.

5. Fire Fighting Measures

Extinguishing Media

Not combustible. Use extinguishing media suited to burning materials.

Fire Fighting

If a significant quantity of this product is involved in a fire, call the fire brigade.

Fire and Explosion Hazards

The major hazard in fires is usually inhalation of heated and toxic deficient (or both), fire gases. There is no risk of an explosion from this product under normal circumstances if it is involved in a fire.

Only small quantities of decomposition products are expected from this product at temperatures normally achieved in a fire. This will only occur after heating to dryness.

Fire decomposition products from this product are likely to be irritating if inhaled.

Flash point:

Does not burn.

Upper Flammability

Does not burn.

Limit:

Lower Flammability

Does not burn.

Limit:

Autoignition

Not applicable - does not burn.

temperature:

Flammability Class:

Does not burn.

6. Accidental Release Measures

Personal precautions, protective equipment and emergency procedures

Minor Spills

Clean up all spills immediately.

Avoid breathing vapours and contact with skin and eyes.

Control personal contact with the substance, by using protective equipment.

Contain and absorb spill with sand, earth, inert material or vermiculite.

Major Spills

Minor hazard.

Clear area of personnel.

Alert Fire Brigade and tell them location and nature of hazard.

Control personal contact with the substance, by using protective equipment as required.

7. Precautions for handling and storage

Precautions for safe handling

Precautions for Safe Handling	Limit all unnecessary personal contact. Wear protective clothing when risk of exposure occurs. Use in a well-ventilated area. Avoid contact with incompatible materials. DO NOT allow clothing wet with material to stay in contact with skin
Other Information	Store in original containers. Keep containers securely sealed. Store in a cool, dry, well-ventilated area. Store away from incompatible materials and foodstuff containers.

Conditions for safe storage, including any incompatibilities

Suitable containers	Polyethylene or polypropylene container. Packing as recommended by manufacturer. Check all containers are clearly labelled and free from leaks.
Storage Incompatibility	None known

8. Exposure controls /personal protection

The following Australian Standards will provide general advice regarding safety clothing and equipment:

Respiratory equipment: **AS/NZS 1715**, Protective Gloves: **AS 2161**, Occupational Protective Clothing: AS/NZS 4501 set 2008, Industrial Eye Protection: **AS1336** and **AS/NZS 1337**, Occupational Protective Footwear: **AS/NZS2210**.

Occupational exposure limit values

Name	STEL		TWA	
	mg/m3	ppm	mg/m3	ppm
Ethanol			1880	1000

Exposure limits have not been established by SWA for any other significant ingredients in this product.

No special equipment is usually needed when occasionally handling small quantities. The following instructions are for bulk handling or where regular exposure in an occupational setting occurs without proper containment systems.

Ventilation:	This product should only be used in a well-ventilated area. If natural ventilation is inadequate, use of a fan is suggested.
Eye Protection:	Eye protection such as protective glasses or goggles is recommended when this product is being used.
Skin Protection:	You should avoid contact even with mild skin irritants. Therefore, you should wear suitable impervious elbow-length gloves and facial protection when handling this product. See below for suitable material types.
Protective Material Types:	We suggest that protective clothing be made from the following materials: rubber, PVC.
Respirator:	Usually, no respirator is necessary when using this product.

However, if you have any doubts consult the Australian Standard mentioned above. Otherwise, not normally necessary.
Safety deluge showers should, if practical, be provided near to where this product is being handled commercially.

9. Physical and chemical properties

Appearance and colour	Clear mobile liquid
Odour	Neutral odour
pH	In concentrate: 8-9 range
Vapour pressure	No data.
Vapour density	No data.
Boiling point	Approximately 100°C
Boiling range	No data.
Melting point	No data.
Solubility in water	Miscible
Specific gravity	0.98 – 1.0 @ 25 °C
Flash point	Non-Flammable
Solubility limits	N/a
Percent volatile	Approx 80 % v/v

10. Stability and Reactivity

Reactivity	This product is unlikely to react or decompose under normal storage conditions. However, if you have any doubts, contact the supplier for advice on shelf-life properties.
Conditions to Avoid	Keep containers tightly closed.
Incompatible Materials	Oxidising agents.
Fire Decomposition	Only small quantities of decomposition products are expected from this product at temperatures normally achieved in a fire. This will only occur after heating to dryness. Combustion forms carbon dioxide, and if incomplete, carbon monoxide and possibly smoke. Water is also formed. Carbon monoxide poisoning produces headache, weakness, nausea, dizziness, confusion, dimness of vision, disturbance of judgment, and unconsciousness followed by coma and death.
Polymerisation	This product will not undergo polymerisation reactions.

11. Toxicological information

Local Effects:

Target Organs	There is no data to hand indicating any particular target organs.
---------------	---

Classification of Hazardous Ingredients

Ingredient	Risk Phrases
------------	--------------

No ingredient mentioned in the HSIS Database is present in this product at hazardous concentrations.

Ingredient Health effects:

Sodium Bicarbonate	Skin irritation and eye irritation.
Ethoxylated alkyl alcohol	Skin irritation and severe eye damage.

Potential Health Effects

Inhalation	<p>Short Term Exposure: Available data indicates that this product is not harmful. However, product may be mildly irritating, although unlikely to cause anything more than mild transient discomfort.</p> <p>Long Term Exposure: No data for health effects associated with long term inhalation.</p>
Skin Contact	<p>Short Term Exposure: This product is a skin irritant. Symptoms may include itchiness and reddening of contacted skin. Other symptoms may also become evident, but if treated promptly, all should disappear once exposure has ceased.</p> <p>Long Term Exposure: No data for health effects associated with long term skin exposure.</p>
Eye Contact	<p>Short Term Exposure: This product is a severe eye irritant. Symptoms may include stinging and reddening of eyes and watering which may become copious. Other symptoms such as swelling of eyelids and blurred vision may also become evident. If exposure is brief, symptoms should disappear once exposure has ceased. However, lengthy exposure or delayed treatment is likely to cause permanent damage.</p> <p>Long Term Exposure: No data for health effects associated with long term eye exposure.</p>
Ingestion	<p>Short Term Exposure: Significant oral exposure is considered to be unlikely. However, this product is a severe oral irritant. Symptoms may include extreme pain and reddening of skin in mouth and throat. Other symptoms such as blisters may also become evident and may last long after exposure has ceased.</p> <p>Long Term Exposure: No data for health effects associated with long term ingestion.</p>
Carcinogen Status	
SWA	No significant ingredient is classified as carcinogenic by SWA
NTP	No significant ingredient is classified as carcinogenic by NTP.
IARC	No significant ingredient is classified as carcinogenic by IARC.

12. Ecological information

Environmental

May be harmful to aquatic organisms.

13. Disposal considerations

Disposal

Containers should be emptied as completely as practical before disposal. If possible, recycle product and containers either in-house or send to recycle company. If this is not practical, send to a commercial waste disposal site.

14. Transport Information

UN Number

This product is not classified as a Dangerous Good by ADG, IATA or IMDG/IMSBC criteria. No special transport conditions are necessary unless required by other regulations.

15. Regulatory Information

AICS

All of the significant ingredients in this formulation are compliant with NICNAS regulations.

16. Other information

Abbreviations

AICS

Australian Inventory of Chemical Substances

CAS Number

Unique Chemical Abstracts Service Registry Number

EC50

Ecotoxic Concentration 50% — concentration in water which is fatal to 50% of a test population (e.g., daphnia, fish species)

ES

Exposure Standard - The airborne concentration of a biological or chemical agent to which a worker may be exposed in a workday

GHS

Globally Harmonised System of Classification and Labelling of Chemicals

HAZCHEM Code

Emergency action code of numbers and letters that provide information to emergency services, especially fire fighters

IARC

International Agency for Research on Cancer

LEL

Lower Explosive Limit

LD50

Lethal Dose 50% — dose which is fatal to 50% of a test population (usually rats).

LC50

Lethal Concentration 50% — concentration in air which is fatal to 50% of a test population (usually rats)

NICNAS

National Industrial Chemicals Notification and Assessment Scheme

Peak Limitation

Peak Exposure Value: The maximum airborne concentration of a biological or chemical agent to which a worker may be exposed at any time.

SDS

Safety Data Sheet

STEL

Short Term Exposure Limit - The maximum airborne concentration of a chemical or biological agent to which a worker may be exposed in any 15-minute period, provided the TWA is not exceeded

TWA

Time Weighted Average — generally referred to ES averaged over typical workday (usually 8 hours)

UEL

Upper Explosive Limit
