

## PRODUCT DATA SHEET

**Product Name:** **ADVANCED** LD-Pro Concentrate

**Pack Size:** 1L 5L 15L

**SKU:** 735-039 735-040 735-041

### Description:

- A higher strength product developed for the remediation industry.
- Concentrate product to be diluted before use.
- Can be used for general cleaning & sanitising or treating specific microbial contaminations such as mould remediation & flood remediation.
- Diluted, it can be used in a fogging machine to treat air & surface contamination.
- Kills 99.9% of bacteria, germs & mould.
- As it comes into contact with microbes & mould on surfaces, the germ dies as it stops the bacteria from reproducing, it stops the mould from receiving oxygen, preventing growth & reproduction.
- The formulation uses identical actives as the TGA listed Commercial Grade Disinfectant, proven to work against pathogens including SARS CoV-2 virus.

### Applications:

- Ideal for large heavily soiled areas such as mould & flood remediation
- Also great for general cleaning on all surfaces such as benches, cupboards, walls & ceilings
- Soft furnishings ie curtains, lounges, carpet
- Interiors of cars, caravans & motorhomes
- Refrigerators & cold storage rooms
- Safe to use on most surfaces: plastic, timber, canvas, leather, vinyl, fabric, tiles, laminate, metal & chrome, glass, limestone & other carbonate rocks, porcelain & marble
- In washing machine for contaminated clothes

### Storage:

Shelf Life: 2 years after manufacture when stored between 19 - 30°C.

### Ingredients:

SAN-AIR proprietary essential oils & purified water.  
NO petroleum based ingredients.

### Directions for use:

- Shake bottle well before opening.
- For surface application:
  - Add 20ml/Litre of purified water (for heavy soiling, add up to 100ml/Litre of purified water).
  - Apply to surfaces & wipe with a clean cloth - repeat as necessary.
  - Discard cloth or thoroughly wash cloth to avoid recontamination.
- For fogging application:
  - Add 20ml/Litre of purified water.
  - Fog into air & on surfaces.

### Validations:

- Certified food safe
- Actives validated by Eurofins
- Kills 99.9% of fungicidal & sporocidal activity

### Features & Benefits:

- Easy to use & fast acting
- Long lasting & cost effective
- Anti-mould & anti-bacterial
- Independently tested & validated
- Improved air quality
- Non-allergenic
- Safe to breathe, safe to touch
- Biodegradable & sustainable
- NO harsh chemicals
- NO damage to property
- Pet & plant friendly
